

McCormick Guard Program Outline

McCormick Guard & McCormick Guard Premium Extended Care Plans

McCormick Guard and McCormick Guard Premium are purchase plans that may be purchased in addition to the standard 2 year manufacturers base warranty in order to give McCormick owners additional piece of mind and fixed running costs during the ownership of their capital investment.

McCormick Guard Extended Care Plans may be ordered with the tractor from the manufacturer and therefore calculated into monthly finance payments. In addition, the plans may also be ordered separately from a tractor through McCormick Parts as a separate charge.

Plan Options and Coverage

McCormick Guard Extended Care covers the repair or replacement of any failure in the main drive line components only. The main drive line is considered to be anything on the tractor running in or containing lubricating oil; covering transmission, axles, engine, and hydraulics (with the exception of hoses).

McCormick Guard Premium Extended Care covers all items covered under the McCormick Guard Plan plus electric and electronic components, sensors, air conditioning, and mechanical non-cosmetic failures of bodywork and frame.

Requirements for Coverage

It is mandatory that all tractors entered in the McCormick Guard program be serviced annually or every 1,000 working hours by an active McCormick North America Dealer.

All interim 6 monthly or 500 working hour services must also be carried out by a McCormick North America Dealer.

Each plan comes with a \$500.00 deductible and 5 years or 5,000 hours of coverage in conjunction with the standard factory warranty.
